FACILITY SOLUTIONS FROM POLLOCK ORORA

For over 100 years, we have dedicated ourselves to building a strong customer service culture to offer our customers tailored one-on-one consulting, solutions and supplies. That dedication has never been more important as we partner with you to ensure your facilities are safe and clean for you and your customers.

Our facility experts will survey your workplace, school or business and create a comprehensive cleaning and safety solution for your specific needs.

Pollock Orora is ready to help make SOLVED happen.

WE'RE HERE FOR YOU.

THE NEW NORMAL

The new normal is anything but ordinary. Dramatic changes to cleaning and sanitization methods are needed to keep facilities and spaces safe. Customer and tenant needs evolve as public demand evolves. The key to managing this is to be prepared and informed.

► MOVING FROM OUTWARD APPEARANCE TO INWARD PROTOCOLS

The COVID-19 outbreak has caused hygiene and safety to trump sustainability in facilities. Disinfecting, social distancing and hand hygiene are key to making building occupants feel safe.

Rather than just a clean appearance, facilities must now have clearly visible health and safety measures communicated immediately as people walk through the door.

By implementing strict cleaning protocols, using best practices and having an open communication plan, businesses can increase confidence for guests to feel comfortable in their buildings.

In addition, the Global Biorisk Advisory Council (*A Division of ISSA*) offers GBAC STAR™, which is the cleaning industry's only outbreak prevention, response and recovery accreditation for facilities. Successful GBAC STAR facilities are able to demonstrate that correct practices, procedures and systems are in place to prepare, respond and recover from outbreaks and pandemics. Contact Pollock Orora for assistance with accreditation criteria and compliance requirements.

► NEW CLEANING PROTOCOLS

It may seem like old news today, but major shifts in cleaning protocols and needs have occurred in every business and facility. Daily or nightly sanitizing and deep cleaning are the new standard.

Per the CDC², cleaning and disinfecting public spaces require service providers to:

- Evaluate your space
- Develop a plan
- Implement the plan
- Maintain and revise the plan

Adequate inventory of products, supplies and equipment is essential as well as a knowledgeable and trained staff to clean and maintain the facility, as they are on the front-lines of the COVID-19 response. It might seem overwhelming, but Pollock Orora has what it takes to get you through.

- Thermometers
- Desk Caddies and PPE Stands
- Personal Wellness Kits
- Disposable Food Trays
- Wrapped Plastic Cutlery
- UV Sterilization Devices
(for anything from phones to escalator handrails)

DISINFECTANTS

▶ Coronavirus can survive on surfaces for hours or days³. The United States Environmental Protection Agency (EPA) has established specific guidelines for disinfectants that are effective against COVID-19. Our experts will provide a consultative approach to helping you select the best product to disinfect every space.

Pollock Orora has a wide variety of products to create a safe environment, including disinfecting wipes, ready-to-use sprays and aerosols, gallon-size chemicals and dilution control systems. Everything you need to get the job done!

PERSONAL PROTECTIVE EQUIPMENT

▶ We understand how crucial it is to keep your team, guests, tenants and customers safe and healthy. We have the PPE you need to get back-to-business!

Masks

Gloves

Aprons

Coveralls

Safety Glasses

Shoe Covers

ELECTROSTATIC MACHINES

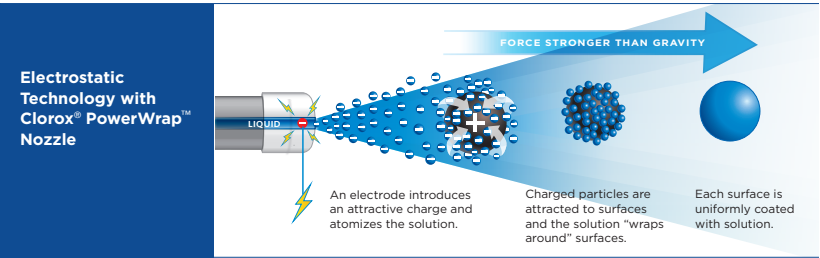

▶ Daily/nightly disinfecting and sanitizing is the new normal. Electrostatic machines apply chemicals faster, use less solution, and provide a more complete and consistent coverage for better germ protection. Electrostatic sprayers are in high demand due to the intense labor cost to clean hard-to-reach places. This type of cleaning method increases the confidence of building occupants that surfaces and spaces are clean and healthy. If you're looking to simplify your disinfecting and sanitizing method, we've got you covered!

The Clorox® Total 360® System pairs an electrostatic sprayer with a portfolio of Clorox disinfectants and sanitizers to ensure all surfaces — even those hard-to-reach, difficult-to-clean areas — are properly treated.

Clorox® Total 360® System...

TAKES LESS TIME
Up to **75% faster***

COVERS MORE
Treat up to **18,000 sq ft/per hour**

REDUCES COST
Uses **65% less solution***

Ideal for disinfecting, sanitizing, odor removal, decontamination, pesticides/fertilizing, and more, are the Professional CORDLESS Electrostatic Handheld and Backpack Sprayers from Victory Innovations. Adjustable 3-in-1 nozzle, double charge technology for maximum coverage, easy fill tank, long lasting battery, completely portable and highly durable.

TOUCHLESS SYSTEMS

► Hand hygiene has been identified as the best solution for prevention and reduction of the spread of germs. This has substantially increased the need for touchless dispensing systems for towels, soap and hand sanitizer. Equally important are automatic flushers, automatic faucets and touchless waste receptacles. The goal is to reduce common touchpoints. Our Pollock Orora team will professionally survey your facility and recommend the best “hands free” bundle for you!

Touchless Tissue and Waste Receptacles

Automatic Faucets, Mounted Soap Dispensers and Flushers

TOWELS AND TISSUE

► The science is clear: single-use paper towels are a more effective and hygienic way to dry your hands after washing. We partner with the major national brands to bring our customers the highest quality towel and tissue options available.

Kimberly-Clark
PROFESSIONAL

Did you know paper towels are the most hygienic option for hand drying?

Single-use towels offer the most effective and most hygienic hand washing solution compared to jet air dryers.

Towels are hygienic:

77%↓ Paper towels are critical to proper hand hygiene, as they can remove up to 77% of the bacteria that remains on hands after washing.

Jet air dryers blow water droplets containing bacteria from the hands as far as 6.5 feet and linger in the air for up to 15 minutes.

The inner surfaces of a jet air dryer can harbor 48 times more bacteria than found on a toilet seat.

Jet air dryers can actually increase bacteria by 42% on users' fingers during the drying process

Towels are preferred:

The World Health Organization recommends single-use paper towels in its patient safety instructions for health care workers.⁴

90% of people show a preference for paper towels over jet air dryers in the washroom.

⁴ WHO "Hand Hygiene Guidelines for Health Care Workers"

This information brought to you by Kimberly-Clark Professional.

MICROFIBER CLEANING SYSTEMS

► Microfiber products are so efficient and well-performing that they can be used for all cleaning applications in all environments. We can tailor a microfiber program to fit any mopping and wiping facility needs.

Color is a visually effective way to prevent cross-contamination. Below are some colors commonly used within different areas of a facility, per industry guidelines.*

- RED: High Risk Areas and Operating Room Beds
- WHITE: Glass and Polished Surfaces
- YELLOW: Bathrooms
- GREEN: General Purpose
- BLUE: Specialty Areas

*Recommended use can vary by application. Follow all established safety procedures. (Info by: Rubbermaid Commercial Products.)

WELLNESS TOOLS

► Part of your facility wellness plan should include tools to prevent and reduce the spread of germs. Social Distancing requirements, temperature checks and healthy workplace products are a few that are part of the new normal.

Thermometers

Hand Sanitizer

Facial Tissue

Floor Mats

Signage

WORK-FROM-HOME ESSENTIALS

► With the adoption of working from home proving successful for many companies, home offices must have the tools to be efficient. Gain easy access to the supplies you need to make your home office run with the extensive office essentials available from Pollock Orora!
